SCHOOL DISTRICT 41

Register at burnabyschools.ca/summersession | 604-296-6902

Summer Session Elementary

REGISTER ONLINE

Burnabyschools.ca/summersession

April 15 – June 30

Tuition Free?

Elementary Students who meet the following criteria are eligible to take one tuition free course. Your child must:

- Be a Canadian Citizen, permanent resident or convention refugee
- Attend a BC school in the 2018-2019 school year and ordinarily resides in BC with parent/guardian
- Have a BC Personal Education Number (PEN)

**Transfers & refunds must be made by July 11.
Students missing 3 days will be withdrawn**

Those not eligible or those signing up for courses requiring fees can pay by cash, Visa or Mastercard.

Learning Support

If your child has an IEP and/or a Fraser Health Care Plan or Consultation Report, and is currently receiving additional learning support from an Education Assistant at school, we encourage you to register online by **May 10 to ensure adequate support is available. First priority of students requiring additional learning support will be given to Burnaby School District regular session students.**

Course Locations & Cancellations

Courses and their locations cannot be guaranteed. Course offerings are subject to sufficient enrolment and may be moved or cancelled prior to the course start date.

IMPORTANT: Final report cards must be presented to the teacher on the first day of academic classes.

IMPORTANT INFORMATION

FOR NON-BURNABY SCHOOL DISTRICT
STUDENTS

Pre-register at burnabyschools.ca/summersession to be able to select courses online starting April 15. (confirmation is necessary). Upon approval, you will receive notification about your eligibility to register for Summer Session courses with the Burnaby School District. Please ensure that you have the following documents, scanned or uploaded, for the online registration process.

Be sure to have the following documents ready during the online registration process:

- **Proof of student's birthdate**
(birth certificate or passport)
- **Proof of guardianship**
(parents' or guardians' as shown on birth certificate or other appropriate legal documentation such as landed immigrant papers or guardianship "order" granted by the courts)
- **Proof of citizenship for both parent and the student**
(Canadian birth certificate, citizenship card, passport, landed immigrant document, permanent resident card)
- **Proof of residency of the parent or guardian and student – 2 required with at least 1 from Category A:** proof of ownership of dwelling or long-term lease or rental of dwelling; legal documents indicating BC residence; parent or guardian filing income tax returns as a BC resident
Category B: BC Hydro bill, BC cable bill, Provincial driver's licence, provincial registration of automobile, Canadian bank accounts or credit cards.
- **Copy of student's most recent school marks**
(report card or transcript of academic record)
- **BC Personal Education Number (PEN)**
- **IEP (Learning Support, if applicable)**

This program covers Volleyball skills in a supportive and fun environment. Participants will work on serving, passing, setting, hitting, blocking, duffing and game play.

Participants should bring athletic clothing and shoes, kneepads and a water bottle. All skill levels are Welcome!
DATES: July 8 – 25 **TIMES:** 8:45am - 12pm
COURSE #2394

ACADEMIC COURSE DESCRIPTIONS

ONE TUITION-FREE ACADEMIC COURSE PER ELIGIBLE STUDENT

Adventures in Music

Come and spend your mornings playing with music! This class uses traditional hand-clapping, ball-bouncing and skipping games to learn music. We will play musical games outside and then come inside to play the rhythms and melodies of the chants and songs on a variety of instruments. The class will include some free exploration of instruments.

Adventures with Reading

Develop an appreciation for the enjoyment of literature, increase confidence with the printed word, and get a jumpstart for September.

Applied Math Workshop

This course focuses on developing math strategies to solve math problems and puzzles. These skills will be applied to authentic practical problems. Projects include designing and constructing a bridge, catapult, and tower.

Art

This art course focuses on developing interactions between each student's creative expressions and their personal appreciation of art. Students will design a portfolio: a collection of their summer artwork and artistic ideas. Projects may include drawing, painting, printmaking, and image development.

Art Media

Explore different media – plasticine, clay, paint, finger knitting, papier mache, making a collage, pointillism, building with cardboard, etc. The goal is to expose new media to students and to teach new art skills.

Beginning Guitar

Students will acquire the skills necessary to play popular songs as well as be introduced to simple classical pieces. Students will work together, in groups, and as a soloist to learn and compose their own melodies. There will be an end of summer schools performance for fellow students. Guitars will be provided for students who do not have their own.

Collaboration & Strategic Thinking

Board games can be the gateway into new worlds and fantastic adventure. This course will focus on strengthening collaboration and critical thinking skills as students work in teams on a class-wide civilization simulation. Together we will explore themes of cultural identity, immigration, commerce and environmental impact.

Drama Studio

Calling all thespians! In this course, students will hone their drama skills through purposeful play. Sessions will include drama games, improv activities and scene studies.

Engineering

Students will explore and examine the integrated process of using STEAM – Science, Technology, Engineering, Art and Math to solve problems. They will develop collaborative skills as they learn to identify problems and design, create, build and test their projects. Online tools (stop motion and coding programs) and physical tools (basic construction) will be used to share their creativity and accomplish tasks in innovative ways. It is recommended that students bring their own headphones and USB sticks.

Engineered Creativity

If you enjoy hands-on engineering projects this course may be for you! In this course you will design and build creative solutions to various challenges using common hand tools in a safe and creative environment. We will focus on design and up-cycling used materials, incorporating basic technical drawing, woodwork and electrical elements.

English Language Learners

These classes are designed to provide opportunities for elementary students to improve their English language skills in an interactive and social environment. The focus is on listening, speaking, reading and writing along with increased vocabulary development. Grade 7 students may register for either the Elementary or Secondary ELL program.

Essay and Report Writing

Learn an easy to follow formula to help communicate ideas and focus thoughts while adding style and meaning to your writing. Students will practice fundamental skills of paragraph organization, topic development, effective conclusions, and revisions/editing skills.

Exploration

These courses provide your elementary-aged child with the opportunity to explore the core competencies in individual and group settings.

Exploration - French Immersion

This course is for elementary-aged French Immersion students. It gives them the opportunity to explore the core competencies in individual and group settings.

Exploring Coding & Digital Design

Students will receive an introduction to new media arts through the use of STEAM applications while learning visual programming logic. Students will develop collaborative skills as they learn to identify problems and design, create, code, and test custom programs and projects. New media art applications involve digital media, digital modelling, game design, robotics, and interactive art, virtual reality development and algorithmic art. It is recommended that students have their own mouse, headphones and USB stick.

Exploring Writing

Do you have a burning desire to be an author? Primary students will work together to build ideas, frame their thinking and use writing to communicate their thinking in a powerful way. Intermediate students will be taken through the steps of the writing process in order to further develop their skills in drafting, editing, revising and critiquing their writing.

Fibre Arts & Design

This course will provide opportunities for students to explore a series of fibre related activities which include spinning wool, sewing, felting, crocheting, and design thinking. Students will engage in creative and cooperative challenges and will develop hands-on skills in several areas.

Film Creation

Students will begin by learning basic skills and then use those skills to create meaningful video presentations. Cutting and editing, how to use a storyboard and how to incorporate visual and audio effects will also be taught. See you in the movies!

ACADEMIC COURSE DESCRIPTIONS

ONE TUITION-FREE ACADEMIC COURSE PER ELIGIBLE STUDENT

French Introduction & Enrichment

Looking to maintain or improve your child/s French during the summer? Thinking about Late French Immersion? This activity-centred and communicative-based course will keep students moving and having fun in French. Open to beginners and novice students.

Gardening Adventures

Students will explore the wonders found outdoors and in the garden at Marlborough. We will participate in a number of nature-inspired language, science, math, and art activities and we will play games outside. We will discover what plants and critters live in our surroundings and learn how to tend a garden and harvest ingredients to make snacks. Be prepared to spend most of the session outside and to have some fun!

Get Ready for Grade 1

Students who have **completed** Kindergarten can participate in this hands-on course which is designed to stimulate minds in playful ways through engaging activities in a social setting.

Get Ready for Grade 1 (French Immersion)

Students who have **completed** French Immersion Kindergarten can participate in this hands-on course which is designed to stimulate minds in playful ways through engaging activities in a social setting.

Get Ready for Grade 4

This course is for students who have **completed** Grade 3. Organizational skills, behavioural expectations, and basic reading, writing and math skills will be explored in a relaxed and inviting atmosphere to help your child be successful in Grade 4.

Get Ready for Grade 4 (French Immersion)

This course is for French Immersion students who have **completed** French Immersion grade 3. Organizational skills, behavioural expectations, and basic reading, writing and math skills will be explored in a relaxed and inviting atmosphere to help your child be successful in Grade 4.

Girls Sports & Recreation

Come and have fun participating in daily physical activities including games, dance, team, and independent athletics, diet and mental well-being. Learn about the negative consequences of social media. Intermediate girls only.

Hands on Science

Students in both the primary and intermediate programs will have fun while learning scientific principles and methods through active hands-on experimentation.

Hola! Spanish

This class will expose students to basic Spanish structure and encourage them to actively use the language through the use of music, games, and cultural crafts. Highly interactive, students will speak and hear Spanish.

Imagination Quest

Your imagination can take you anywhere! An iPad can help you in that journey too. In this creative, imaginative course, students will learn critical thinking, spontaneous problem solving skills, and the power of group work while building spaceships! Children will document their exploration via iPads and explore their ability to problem solve in critical and creative ways.

Inquiry Based Learning

Full of questions? Eager to learn new things? Interested in other points of view? This course will channel the power of children's curiosity as they explore their world. With an emphasis on collaborative, hands-on activities, students will experience the process of inquiry through wondering, investigating, and reflecting. Outdoor explorations will be embedded throughout the course, as will opportunities to explore topics that are responsive to student interests and wonderings.

Introduction to Coding

Learn and utilize introductory coding skills through hands-on experiential methods. You will develop your skills and add new ones through play and collaborative work. Learn to use Scratch for Coding and be introduced to BeeBots and other tech coding resources.

Mind Workshop: Your Brain and You

This course will introduce students to concepts and strategies designed to help them grow and develop as self-motivated, self-reflective learners. Students will learn mindfulness practices and emotional self-regulation strategies and will learn to understand how their brains work and change as they grow. Students will be introduced to the idea of "Growth Mindset" and will learn how to use self-assessment and reflection to achieve personal goals. While they learn these skills, students will have the opportunity to put them into practice while engaging in a variety of ADST challenges and projects.

Odyssey of the Mind

Do you like working with hammers and saws? Do you enjoy crafting? Are you interested in how to make a vehicle move by itself? Design it! Build it! Make it go! We'll think, act, and make our way through creative problems that include construction, vehicles, drama, and art. Learn new ways of thinking about everyday problems. Join us on an Odyssey of the Mind!

Outdoor Odyssey

Read, write, and create some wonderful artwork involving some of the natural wonders surrounding us. Be prepared to be outdoors and to spend some time out in the community. Learn some new games to play outdoors with your friends and family!

Place Based Learning

Students will engage in cross-curricular inquiries exploring place, culture and stories in the incredible outdoor spaced of University Highlands Elementary. Inspired by nature, students will be creating, building, writing, and representing their thinking and learning in place.

ACADEMIC COURSE DESCRIPTIONS

ONE TUITION-FREE ACADEMIC COURSE PER ELIGIBLE STUDENT

Primary Comic Creation

This course is intended to spark Grade 2, 3 and 4 students' love for writing by exploring the popular medium of comic creation! Students will learn about key parts of effective comic strips. Using paper and pencil as well as iPad technology, students will work to make imaginative and creative comic strips.

Robotics - Scratch/Sphero

Using Scratch online coding and Sphero robots, students will work in teams to solve problems, do online animation, program and use robots. This class will focus on building teamwork and thinking skills.

Robotics - VexIQ

Students will work in teams to build online code, put together and program robots and solve problems. This class will focus on developing technology, teamwork and thinking skills.

Robotics & Design

Using VexIQ robots and TinkerCad, students will build and program robots, as well as a variety of electronic units. This class will focus on building electronics, technology, teamwork, and thinking skills.

Rock Band

Rock out this summer! Play, sing and perform your favourite rock and pop songs. We provide everything you need – guitars, bass, keyboards, drums and microphones for singers! It's a great way to improve your technique and learn pro tips for performing with a group if you already play or sing, and a fun introduction to being in a band even if you're new to an instrument. Our fun three week program covers different eras so you'll learn new songs too! The final day is a real rock concert in the gym for students and staff!

Sewing & Fashion Design

Learn how to use a sewing machine and create fun and exciting designs you can wear. Learn to troubleshoot an issue that can arise when designing a product and to think outside the box. You will learn about different types of fabrics and explore how clothing can allow for self-expression and creativity.

Short Film Making Adventures

Story tell using video and picture in this interactive hands-on class! We will be using iMovie, iPads and other technologies to create short films and broaden our understanding of film production and visual story telling. This is a project-based collaborative course; participation and attendance in every class is essential.

Sports & Recreation

Continue to develop your physical abilities through a variety of athletic activities. Skill development, game strategy, physical fitness and recreation opportunities will help you hone your athletic skills. Learn the health benefits of regular physical activity and how to access opportunities to be active in the school and community through this fun and informative course. Participants will learn to set goals, develop a plan, and work towards improving fitness levels while developing new physical activity skills.

Uke Got It! Ukulele

Intermediate students will be introduced to the soprano ukulele, learning how to finger pick songs and play chords. The repertoire will consist of pop music and you will work on your singing technique as you create mash-ups of popular songs

ACTIVITY & ENRICHMENT PROGRAMS & CAMPS

REQUIRES TUITION – SEE PAGES 3 & 4

Adventures in Coding

Learn and utilize introductory coding skills through hands-on experiential methods. You will develop your skills and add new ones through play and collaborative work. Learn to use Scratch for Coding and be introduced to BeeBots and other tech coding resources.

Art & Design

Art and Design inspires, engages, and challenges students, equipping them with the knowledge and skills to experiment, invent, and create their own works of art. Students will be able to think creatively and critically to develop a greater understanding of art and design.

Board Gaming

Do you like games? Using inspiration from children's books, students will work in teams to design, play, improve, and present board games of their own. Students will use critical and creative thinking in a fun, cooperative learning environment that develops math and literacy skills.

Canadian Art Inspirations

Come and explore Canadian environments through art and literacy connections. Students will immerse themselves in variety of First Nations inspired art activities. Learn to weave on looms, study and create poetry and play creative games. Students will create portfolios to exhibit their creative processes.

ACTIVITY & ENRICHMENT PROGRAMS & CAMPS

REQUIRES TUITION – SEE PAGES 3 & 4

Drama/Musical Theatre

Are you interested in drama and improve? Are you interested in participating in a play or musical? Students will have an opportunity to guild their own sets and props during art activities and perform in their own play or musical.

Electronics

Students will have the opportunity to work with 3D printers, robots, digital photography, and Arduino, along with a variety of other electronic gear to make electronics projects. This Makerspace approach will use groups and the interests of students to design and build a variety of projects

Engineering and Machines

This course will have students take part in hands-on mechanical engineering activities. Ideas will go through a design process, followed by constructions, analysis and redesign. Projects will use simple tactile materials and incorporate the fundamentals of simple and complex machines.

Enrichment Art

This program offers flexibility, differentiated instruction, community building, skill building, and self-discovery through visual arts, while incorporating some “outside the box” opportunities for arts exploration. Students will discover what they love about creating and appreciating art, and how art influences their lives and learning.

Health and Fitness

This program focuses on physical activity, health, and overall wellness. Different types of physical activities and cooperative games will be incorporated. As well, students will be taught how to make healthy snacks and learn about healthy eating.

iPad Film Making

Use iPads to create short films! This class will be like a film school where students learn how to cut and edit, storyboard, add visual and audio effects, and how to present a variety of types of information and emotions.

Maker Space

Students will invent and build together in groups to solve problems. The focus will be to develop creative and critical thinking as well as collaboration skills.

Play with a Purpose

Come participate in your favourite games while learning a few new ones. Students will learn the benefits of an active, healthy lifestyle away from screens in a fun, cooperative, and interactive environment.

Rube Goldberg Machines

In this course students will be provided with materials in a “Makerspace” fashion to build inventions/machines to do basic jobs. This will be a whimsical and academically rich experience for students. Included in this course will be the use of circuits, pulleys, magnets, coding, and various other materials.

Story Drama

Story Drama explores story telling with a focus on Indigenous stories. Students will explore acting and purposeful play activities that builds on an understanding of literacy and culture using First People’s Principles of Learning. Come and play with us!

Visual Arts

Students will learn to work with clay to create functional and sculptural artwork pieces, as well as learn the processes of glazing and firing through wet, bisque, and finished stages. Hand-building techniques will be taught such as coiling and pulling. Pinch pots and natural materials will be used to help incorporate lines, patterns, and various elements of design

BYTE CAMPS

THESE COURSES REQUIRE TUITION AND ARE FULL DAY PROGRAMS

INTRODUCTION TO CODING

(Ages 9-12)

Discover how much fun it is to build your own game! Students will be introduced to making 2D vector artwork and learning basic coding skills with easy to use drag-and-drop software. Then they get to use those skills to make their very own video games!

July 2-5 9am-4pm Course #8505
Burnaby North Secondary \$265

3D ANIMATION

(Ages 11-14)

Dreaming of a career with PIXAR? Spend the week learning how those movies are made by modeling, animating and telling your story in 3D using awesome, free software; Blender. Final projects are usually group projects with each student contributing a character and a scene.

July 22-26 9am-4pm Course #8507
Burnaby North Secondary \$310

BUILD AN APP

(Ages 11-14)

Learn how to design, code, test and deploy your very own game! Use advanced coding skills to build your app from scratch. Be prepared to challenge yourself and learn some new skills. Previous coding experience or Byte Camp's 2D Video Game Design is recommended.

July 8-12 9am-4pm Course #8503
Burnaby North Secondary \$310

2D VIDEO GAME DESIGN

(Ages 11-14)

Learn how to build an HTML5 game from the ground up! This is a coding camp, so be prepared to challenge yourself and learn some new skills in javascript and advanced 2D vector artwork. Previous coding experience or Byte Camp's Introduction to Coding is recommended.

July 29-Aug 2 9am-4pm Course #8500
Burnaby North Secondary \$310

CLAYMATION MOVIE PRODUCTION

(Ages 9-12)

Make your own clay characters come to life, just like Shaun the Sheep! Students will work in teams to build their own clay characters, sets and props; develop their own script; shoot their scenes; and then learn to edit and add sounds and special effects to complete the whole project.

July 15-19 9am -4pm Course #8509
Burnaby North Secondary \$310

MUSIC & VIDEO PRODUCTION

(Ages 9-12)

Make your own music and music video! Use amazing software to craft your very own song from scratch. Learn the basics on beats, baselines, chords and melodies to make it sound awesome. Then, experiment with video, special effects and editing techniques to make a video as cool as your tune.

August 6-9 9am-4pm Course #8501
Burnaby North Secondary \$265
