# ACADEMIC COURSE DESCRIPTIONS

## ONE TUITION-FREE ACADEMIC COURSE PER ELIGIBLE STUDENT

### Adventures in Music (Primary & Intermediate)

Come and spend your mornings playing with music! This class uses traditional hand-clapping, ball-bouncing and skipping games to learn music. We will play musical games outside and then come inside to play the rhythms and melodies of the chants and songs on a variety of instruments. The class will include some free exploration of instruments.

### Adventures in Reading

Develop an appreciation for the enjoyment of literature, increase confidence with the printed word, and get a jumpstart for September.

### Art (Primary and Intermediate)

This art course focuses on developing interactions between each student's creative expressions and their personal appreciation of art. Students will design a portfolio: a collection of their summer artwork and artistic ideas. Projects may include drawing, painting, printmaking, and image development.

### Beginner Guitar

Intermediate students will learn to play acoustic guitar. How to play chords, count rhythms and beats and to pick notes. Students will also develop their singing technique as they work together to create performances of pop songs.

### Comic Creation

This course is intended to spark Grade 2, 3 and 4 students' love for writing by exploring the popular medium of comic creation! Students will learn about key parts of effective comic strips. Using paper and pencil as well as iPad technology, students will work to make imaginative and creative comic strips.

### Drama Studio

Calling all drama lovers! Through this course, students will hone their drama skills through drama games, improve activities and scene studies.

### Engineering

If you enjoy hands-on engineering projects this course may be for you! In this course you will design and build creative solutions to various challenges using common hand tools in a safe and creative environment. We will focus on design using a variety of materials.

### Environmental Inquiry

Get engaged with the outdoors and nature. This course will incorporate aspects of nature that will inspire the curiosity of young learners. We will be studying different phenomenon and objects found in nature (plants, animals, etc.) through an inquiry based platform.

### English Language Learners

These classes are designed to provide opportunities for elementary students to improve their English language skills in an interactive and social environment. The focus is on listening, speaking, reading and writing along with increased vocabulary development. Grade 7 students may register for either the Elementary or Secondary ELL program

### Exploring Writing (Primary and Intermediate)

Do you have a burning desire to be an author? Primary students will work together to build ideas, frame their thinking and use writing to communicate their thinking in a powerful way. Intermediate students will be taken through the steps of the writing process in order to further develop their skills in drafting, editing, revising and critiquing their writing.

### Fibre Arts & Design

This course will provide opportunities for students to explore a series of fibre related activities which include spinning wool, sewing, felting, crocheting, and design thinking. Students will engage in creative and cooperative challenges and will develop hands-on skills in several areas.

### French Introduction (Intermediate)

Looking to maintain or improve your child/s French during the summer? Thinking about Late French Immersion? This activity-centered and communicative-based course will keep students moving and having fun in French. Open to beginners and novice students.

### Gardening Adventures

Students will explore the wonders found outdoors and in the garden. Students will participate in a number of nature-inspired language, science, math, and art activities and will play games outside. Discover what plants and critters live in our surroundings and learn how to tend a garden and harvest ingredients to make snacks. Be prepared to spend most of the session outside and to have some fun!

### Get Ready for Grade 1

Students who have **completed** Kindergarten can participate in this hands-on course which is designed to stimulate minds in playful ways through engaging activities in a social setting.

### Get Ready for Grade 1 (French Immersion)

Students who have **completed** French Immersion Kindergarten can participate in this hands-on course which is designed to stimulate minds in playful ways through engaging activities in a social setting.

# ACADEMIC COURSE DESCRIPTIONS

## ONE TUITION-FREE ACADEMIC COURSE PER ELIGIBLE STUDENT

### Hands on Science (Primary + Intermediate)

Students will have fun while experimenting through active hands-on experimentation. **CANCELLED**

### Introduction to Coding

Learn and utilize introductory coding skills through hands-on experiential methods. You will develop your skills and add new ones through play and collaborative work. Learn to use Scratch for Coding and be introduced to BeeBots, Minecraft and other tech coding resources.

### iPad Film Making

Students will begin by learning basic skills and then use those skills to create meaningful video presentations. Cutting and editing, how to use a storyboard and how to incorporate visual and audio effects will also be taught. See you in the movies!

### Kids Can Cook!

Do you like to eat? Join the culinary adventure. Come and learn how to make interactive hands-on everything from scratch. Before you know it, you will be the next Jamie Oliver. **CANCELLED**

### Maker Space

Students will invent and build together in groups to solve problems. The focus will be to develop creative and critical thinking as well as collaboration skills

### Mind Workshop: Your Brain and You

This Course will introduce students to concepts and strategies designed to help them become more effective learners. Students will learn about self regulation strategies that will help them work and change as they grow. While they learn these skills, students will have the opportunity to put them into practice while engaging in a variety of ADST challenges and projects. **CANCELLED**

### Outdoor Adventures - French

This French course provides students with an opportunity to discover the world through inquiry (forms) and explore sustainable practices. Through inquiry and exploratory based activities, students will work toward maintaining and improving their spoken and written (non-fiction) French language skills. **CANCELLED**

### Photography

Learn to create beautiful pictures, and how to share them. **CANCELLED**

### Robotics - Scratch/Sphero

Using Scratch online coding and Sphero robots, students will work in teams to solve problems, do online animation, program and use robots. This class will focus on building teamwork and thinking skills.

### Robotics - VexIQ

Students will work in teams to build online code, put together and program robots and solve problems. This class will focus on developing technology, teamwork and thinking skills.

### Robotics + Design

Using VexIQ robots and TinkerCad, students will build and program robots, as well as a variety of electronic units. This class will focus on building electronics, technology, teamwork, and thinking skills.

### Rock Band

Rock out this summer! Play, sing and perform your favourite rock and pop songs. We provide everything you need - guitars, bass, keyboards, drums - to improve your skills. If you are already in a band, you can play with your group if you already have a band. If you are not, you can even if you're new to a band. This is different eras, so you'll learn new songs too! The final day is a real rock concert in the gym for students and staff! **CANCELLED**

### Sewing

Learn to create exciting designs and exciting designs. You can create exciting designs when you create exciting designs. You will learn about different types of fabrics and explore how clothing can allow for self-expression and creativity. **CANCELLED**

### Short Film Making

Story tell using video and picture in this interactive hands on class! We will be creating short films and visual story telling. This is a project based collaborative course; participation and attendance in every class is essential. **CANCELLED**

# ACADEMIC COURSE DESCRIPTIONS

ONE TUITION-FREE ACADEMIC COURSE PER ELIGIBLE STUDENT

## Sports & Recreation (Primary & Intermediate)

Continued activities for recreation, health, and opportunities to become more active and informative course.

**CANCELLED**

## Uke Got It! Ukulele

Intermediate students will be introduced to the soprano ukulele, learning how to finger pick songs and play chords. The repertoire will consist of pop music and you will work on your singing technique as you create mash-ups of popular songs.

## Volleyball

This program covers volleyball skills in a supportive and fun environment. Participants will learn digging and game rules, including shoes, kneepads, and a water bottle.

**CANCELLED**

## ACTIVITY PROGRAMS

REQUIRES TUITION – SEE PAGE 3 & 4

## Adventures in Coding

Learn to code with hands-on experiential learning through play and collaborative work. Learn to use Scratch for Coding and be introduced to BeeBots and other tech coding resources.

**CANCELLED**

## Drama/Musical Theatre

Are you interested in an opportunity to participate in a guild or club? We provide costumes and perform in their own play or musical.

**CANCELLED**

## Art & Design

Art and Design inspires, engages, and challenges students, equipping them with the knowledge and skills to experiment, invent, and create their own works of art. Students will be able to think creatively and critically to develop a greater understanding of art and design.

## Canadian Art Inspirations

Come and explore Canadian environments through art and literacy connections. Students will immerse themselves in variety of First Nations inspired art activities. Learn to weave on looms, study and create poetry and play creative games. Students will create portfolios to exhibit their creative processes.

## Coding/Minecraft

Through collaborative learning, students will display their work, and be self-directed while learning the basics of coding and how to operate a computer.

**CANCELLED**

## Digital Photography

Learn about the various composition techniques that are used in photography. Students will implement these techniques through practice and hands on learning. We will explore the different types of photography and photography styles. Explore the importance of photography; how images are used, what is being communicated and how this changes the world.

## Electronics

Students will have the opportunity to work with 3D printers, robots, digital photography, and Arduino, along with a variety of other electronic gear to make electronics projects. This Makerspace approach will use groups and the interests of students to design and build a variety of projects.

## Engineering and Machines

This course will have students take part in hands-on mechanical engineering activities. Ideas will go through a design process, followed by constructions, analysis and redesign. Projects will use simple tactile materials and incorporate the fundamentals of simple and complex machines.

## Enrichment Art

This program offers flexibility, differentiated instruction, community building, skill building, and self-discovery through visual arts, while incorporating some “outside the box” opportunities for arts exploration. Students will discover what they love about creating and appreciating art, and how art influences their lives and learning.

## Knitting

Learn the basics of knitting and create some simple projects to get you started on a life-long hobby.

# ACTIVITY PROGRAMS

REQUIRES TUITION – SEE PAGE 3 & 4

## Movie Making

Use iPads to create short films! This class will be like a film school where students learn how to cut and edit, storyboard, add visual and audio effects, and how to present a variety of types of information and emotions.

## Rube Goldberg Machines

In this course students will be provided with materials in a “Makerspace” fashion to build inventions/machines to do basic jobs. This will be a whimsical and academically rich experience for students. Included in this course will be the use of circuits, pulleys, magnets, coding, and various other materials.

## Sewing & Fashion Design

Unleash your creativity by designing your own clothes using sewing machines with different types of fabric. Consider the overall aspect of a design to make it truly unique. For this class, a knowledge of basics of sewing is recommended (such as threading a machine).

**CANCELLED**

## Visual Arts

Students will learn to work with clay to create functional and sculptural artwork pieces, as well as learn the processes of glazing and firing through wet, bisque, and finished stages. Hand-building techniques will be taught such as coiling and pulling. Pinch pots and natural materials will be used to help incorporate lines, patterns, and various elements of design.

## Visual Arts - Clayworks

This course focuses on clay techniques and self-expression through clay-based activities using a kiln. Working indoors and out, students will take inspiration from nature, and get ideas through play and text.
